ACXT Token

The Maker Governance Token of ACDX

ACXT is the native token of ACDX and also a vital piece of the exchange's architecture & development. Users will be able to use the utility token to enjoy benefits and privileges.

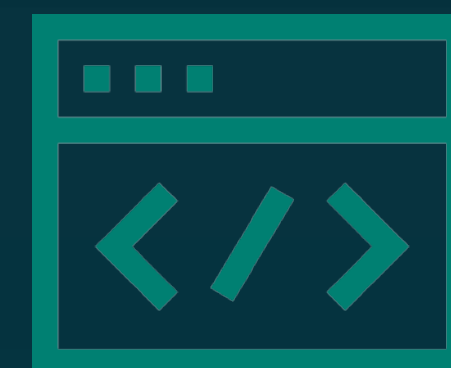

Earn ACXT token by providing liquidity (maker orders) to ACDX platform.

Vote to modify token burn rate, fees, handling of hard forks etc.

Vote to decide on listings at ACDX.

Vote to modify contract specifications, features & functions at ACDX.

ACXT Incentive Pool for Makers

Maker tokens will unlock linearly over a 4-year period.

Each day, the amount of tokens unlocked for makers will be:

$15,000,000 \text{ ACXT} / 365 + 365 + 365 + 366 \text{ days}$

= 10,266.94 ACXT

All 42,191 ACXT will be injected into the incentive pool for liquidity providers (order makers) of ACDX every day.

The makers will split the incentive pool on a pro rata basis to their maker volume on that day.

E.g. John contributed 30% of the total maker volume of ACDX on a day. He will receive $10,266.94 \times 30\% = 3,080$ ACXT as an incentive.

ACXT Quarterly Buy Back & Burn

**Token burn
amount = 50% of maker fees received by
the exchange every quarter**

E.g. In a quarter, ACDX received a total of \$1,000,000 of maker fees from all markets. 50% (\$500,000) of the fees will be injected to the insurance fund of the exchange. The remaining 50% (\$500,000) will be used to buy back the ACXT tokens from our secondary market. The tokens bought will be sent to a black hole address.
