Fair process: same pool fees for all tiers, you don't get taken advantage of by premium OTC deals.

Skin In The Game

Half of the pool fees will be fully re-invested in said deals, with all realized profits used to buy back and burn the GAINS token. In perpetuity.

E.g.: in case of 40 deals a year, an average of \$500k per deal, 5% pool fee and 10x ROI, that's $40 * \$500k * 2.5\% * 10 = \$5M$ to be bought back and burnt.

GAINS will also be buying back its tokens with 10% of its revenue from sources other than the pool fees.

The buybacks and burns will happen at random times to prevent front running, but the amounts will subsequently be made public.

Team, advisors & partners tokens

Reminder: all these have a 1-year cliff, followed by 25% per quarter for a year.

In addition to the above vesting schedule, there is another condition: **for each 1% of these tokens to be released, a cumulative ROI of 10x must be achieved.**

E.g.: 3 of our deals get listed, yielding ROI of 5x, 12x and 43x, respectively. As $5 + 12 + 43 = 60$, 6% of these tokens can be unlocked, once they vest.

If not enough ROI has been achieved when these tokens vest, they will remain locked until sufficient cumulative ROI is achieved.

Only once a combined cumulative ROI of 1,000x is achieved, and the 2-year vesting period is up, the 100% of the team, advisors & partners tokens can become fully unlocked.

This will ensure our continuous motivation and long-term commitment to the project.

The GAINS Tokens purchase is not open to any US person (as such term is defined in Regulation S of the US Securities Act of 1933, as amended) nor to the residents of the People's Republic of China. By reading this document and/or purchasing GAINS Tokens, all potential GAINS Tokens purchasers warrant, represent and agree that they are not citizens, tax or permanent residents of a country where the purchase of cryptographic tokens, such as the GAINS Tokens, is prohibited, restricted or requires registration of any kind. The information contained herein is subject to change, notably, in consideration of the evolutions that may occur on the GAINS Project structure due to regulations, business opportunities or project development. The GAINS project is to issue cryptographic tokens, the GAINS Tokens, usable only on a dedicated platform (the "Platform"), allowing holders to access private sales using the GAINS platform.

The GAINS Project presents several risks for potential subscribers, in particular that of losing all amounts invested in the GAINS Token Sale, in case of prohibition of it by any law or regulation, or for any other reason.
